EXPERIENCE

Freelance — *Full Stack Developer*

DEC 2018 - PRESENT

Integrating her development and design skills, she works closely with e-commerce business founders to transform their ideations into actualized bespoke digital experiences.

PROJECTS

SERA Theme – Liquid

- Developed a *Shopify* theme from scratch. This theme is fully customizable and is on the market for sale.
- Utilizing Shopify's robust e-commerce capabilities, I wanted to provide my design clients with an aesthetic e-commerce web template that stands out amongst the other Shopify themes.

LIVE SITE   CODE

Methodical Minds – HTML/CSS/SASS/JavaScript/Python/Flask/PostgreSQL

- A full-stack web application allows users to search for books and view, add, and store reviews in the PSQL database. View ratings and number of reviews per book accessing the GoodReads API.
- The project is based on *Harvard's CS50* course curriculum.

LIVE SITE   CODE

Films De La Créme – HTML/CSS/SASS/JavaScript/React/ReactRouter/Python/Flask/Firebase

- A full-stack web application in which users have access to movies and tv shows and other information using the TMDB API data.

LIVE SITE   CODE
